

This publication of the WCIO Workers Compensation Data Specifications Manual includes a number of field name changes made to improve consistency in data element conventions, presentation and wording throughout all WCIO manuals. Additionally, in this publication the larger (parent) data elements that were previously comprised of two or more (child) sub-elements data elements, have been broken out into separate data elements. The current element (parent) name will remain and be displayed as a heading and the sub-elements (children) listed below and shown with their own reporting requirements and formats. These changes represent title and presentation changes only and **no changes have been made to the reporting requirement**. The element/sub-element changes are identified in the “Reason for Update” column as such.

Also, concurrent with this publication, the WCIO has removed all hardcopy and pre-ASWG references from the WCSTAT. If data providers still need instruction on how to report pre-ASWG units or hardcopy Unit Statistical Reports (USRs), they should use the archived versions of WCSTAT that reside on the archive section of the WCIO website. Furthermore, the hardcopy Unit Statistical Report form will be repositioned on the WCIO website as a stand alone product and be presented as a standard WCIO USR viewing format. If you have any questions about reporting report pre-ASWG or hardcopy USRs you can also contact a specific jurisdiction for more information on their reporting requirements.

The number of actual new data elements added to this publication is very limited and those elements are identified in the “Reason for Update” column as “Added New Field.”

Many of the code lists that are shared across WCIO products have been updated for consistency. These too are not necessarily “new” codes but rather improvements to presentation of the code lists.

This chart lists areas of the Manual that were modified from that version’s prior publication and includes the following information:

- Manual Specification Name or Document Name
- Section Number
- Record Name (if applicable)
- Field Number (if applicable)
- Field Name or Item Name (if applicable)
- Reason for the Update

This update makes use of the “Track Changes” feature so the reader can follow along.
