**WORKERS COMPENSATION STATISTICAL  
REPORTING SPECIFICATIONS (WCSTAT)**

**SECTION 1**

**INSURER PREPARATION OF UNIT REPORT AND ICR DATA**

**TAPE SPECIFICATIONS**

1. Tape must be wound on reels in lengths of not less than 600 feet nor more than 2,400 feet.
2. Tape reel or cartridge must be file protected prior to shipment to the rating organization/statistical agent/jurisdiction.
3. Reflective spots must be present and properly located.
4. Tape reels and cartridges must be packed properly to avoid damage in shipment.
5. Data must be reported on appropriate track record modes.

The following table shows the acceptable characteristics.

Trackage	Density (BPI)	Labels	Parity	Data
9	1,600, 6,250*	Standard	Odd	Odd

\* The use of 9-track tapes with 6,250 BPI odd parity is preferred.

6. Preferably, data may be submitted via tape cartridges (3,480).
7. Data is to be reported in 250-byte record images, as shown in the Record Layout Chart using EBCDIC.
8. Data must be blocked 20, i.e., 5,000 characters per block. The final block may be a "short block"; do not fill with padding. There is to be no record mark at the end of a record, nor a group mark at the end of a block.
9. Data submitted on cartridge must be noncompressed for all rating organizations, except for DE, MA and PA, which can accept noncompressed or compressed (using IDRC or ICRC).
10. In addition to its external physical label, each tape, diskette or cartridge shall contain "Third Generation Computer" type internal labels generated as "Standard Labels" by IBM 360 DOS or OS operating systems.
11. The Submission Control Record, only one per submission, **must** be the last data record on the last tape or cartridge.
12. All tapes, diskettes or cartridges shall have an external label showing the following information:
  - a. Carrier or Group Name
  - b. Transmittal Date
  - c. Operating system used to create this tape
  - d. Number of tracks on tape
  - e. Density of tape
  - f. Parity of tape
  - g. Data set name on internal label
  - h. Serial number
  - i. Sequence number
  - j. Effective month and year of primary data being submitted on tape
  - k. Transmittal (Letter) Serial #

**NOTE:** Although magnetic tape is the predominant transfer method, other electronic data submission options are available in some jurisdictions. Contact jurisdiction for details.

**NOTE:** Wisconsin will no longer accept tape submissions. Effective 1-1-05, Compensation Data Exchange (CDX) is the only option for submitting data in Wisconsin.

**Submission Control Record (Electronic Data Reporting Only)—Record Type Code 9**

Provides the total number of records (excluding Record Type Code 9) unit reports, and ICRs contained in a submission. Only one Submission Control Record (Record Type Code 9) is allowed per submission, regardless of the number of electronic files for the submission, and it must be the last record on the last file. This record type is required.

In order to reduce the number of tapes, diskettes, etc., to be handled, a submission may contain all unit report levels for all the insurers within a carrier group. Data for more than one state may be reported within the same submission to NCCI.

## DATA ELEMENT COMPARISON (CONT'D)

### Fields Not Available on Current Hard Copy Form

Use Reserved for Future Use located on the third line of the loss record to report the following loss data elements, separated by a vertical line:

- Weekly Wage Amount
- Scheduled Indemnity—Percentage of Disability
- Total Incurred Vocational Rehabilitation Amount
- Gross Incurred Amount

Use the Reserved area on the header to indicate pre-ASWG, expanded or ASWG units. Refer to the appropriate Statistical Plans.

### Accident Date/Number of Claims

Accident date and number of claims share the same field on the hard copy form. These data elements have separate fields on the electronic format.

### Use of Shading on Hard Copy Forms

Shading is used in the update type column to demonstrate the appropriate placement of the update type code. The loss and mod records require only one update type, but without the shading there are three available spaces for the code. The second and third line of the loss record are shaded to indicate that the loss update type should be on the first line. Exposure lines A and C are shaded to indicate that the mod update type should be reported on line B.

The loss amounts contained on the third line of the hard copy form are shaded to facilitate the summation of losses. Since ALAE Paid and ALAE Incurred are directly beneath Paid Indemnity and Paid Medical, the shading provides a visual separation.

**7 REPORT LEVEL CODE/REPORT NUMBER**

(AN) 39 1

Report the code that corresponds to the report level based on the loss valuation date.

Electronic reporting:

Code	Report Level	Loss Valuation Schedule
1	First Report	Valued 18 months from policy effective month
2	Second Report	Valued 30 months from policy effective month
3	Third Report	Valued 42 months from policy effective month
4	Fourth Report	Valued 54 months from policy effective month
5	Fifth Report	Valued 66 months from policy effective month
6 *	Sixth Report	Valued 78 months from policy effective month
7 *	Seventh Report	Valued 90 months from policy effective month
8 *	Eighth Report	Valued 102 months from policy effective month
9 *	Ninth Report	Valued 114 months from policy effective month
A*	Tenth Report	Valued 126 months from policy effective month

The above character array will accommodate up to 35 report levels when using "A" through "Z" in lieu of "10" through "35". Report "1" through "9" and then "A" through "Z" as the report number in those jurisdictions requiring more than 9 report levels.

This field is the most current/correct value for this data element.

Hard copy reporting:

8	<b>CORRECTION SEQUENCE NUMBER</b>	(AN)	40	1

Report the number that corresponds to the number of correction reports submitted within a particular report level.

Exposure and loss corrections on the same report level must be numbered consecutively.

**NOTE:** CA only—This field is used to determine if the report is sent as a correction. The sequence of the correction is not stored or used for processing.

Electronic reporting—Report “1” through “9” and then “A” through “Z” as a correction number within a particular report level. This number sequence will accommodate up to 35 corrections. Report “0” for noncorrections.

This field is the most current/correct value for this data element.

Electronic example: Third correction to a first report = Report Level Code 1, Correction Sequence Number 3. This is the revised correction sequence number on header corrections to change the correction sequence number.

Hard copy reporting—Report the sequential number that corresponds to the number of correction reports submitted within a particular report level. Report blanks for original report level submissions.

Use this field to report the value that was originally reported for this data element.

**EXPOSURE RECORD (CONT'D)**

Field No.	Field Title/Description	Class	Position	Bytes
	Hard copy reporting—This is a 5-digit field. Hard copy reporting format—XX.XXX. For hard copy, it is acceptable to suppress leading zeros of the Experience Modification Factor.			
	If a change in experience modification factor occurs subsequent to the policy effective date due to an Anniversary Rating Date change, the payrolls, authorized rates, and corresponding premiums must be split and reported on separate pages of the hard copy unit report.			
16	<b>EXPERIENCE MODIFICATION EFFECTIVE DATE</b> Refer to specific jurisdictions for requirements.	(N)	55–60	6
	Normally, this is the effective date of the policy. However, if the experience modification changes in accordance with Experience Rating Manual rules, this is the effective date of the experience modification that applies to the exposure reported in this detail record. Report this date in YYMMDD format.  For electronic reporting, this is required on all exposure records. Format: YYMMDD.  For hard copy reporting, this is only required when different from the policy effective date. Format: MM/DD/YY.			
17	<b>RATE EFFECTIVE DATE</b> Refer to specific jurisdictions for requirements.	(N)	61–66	6
	Normally, this is the effective date of the policy. However, if the rate changes in accordance with Ratemaking Manual rules, this is the rate effective date that applies to the classification code and exposure reported in this detail record.  <b>NOTE:</b> MN only—The date reported must be prior or on the effective date of the policy. No midterm rate adjustments are allowed in Minnesota.  For electronic reporting, this is required on all exposure records. Format: YYMMDD.  For hard copy reporting, this is only required when different from the policy effective date. Format: MM/DD/YY.

	Payroll Exposure Amount: Report the entire whole dollar exposure amount for each classification assigned to the policy to the nearest whole dollar amount.  Non-Payroll Exposure: Report non-payroll exposure amounts to the nearest tenth of a unit, omitting the decimal point. For non-payroll exposure amounts, there is an assumed decimal point between Positions 75 and 76.  Electronic example: The decimal point is assumed between positions 75 and 76. To report one and one-half per capita exposure, enter a “15” in the exposure amount field.  Hard copy example: To report one and one half per capita exposure use “1.5” in the exposure amount field.

For non-exposure classifications the premium is defined by the classification/statistical code. For other than payroll exposure classifications the premium is the exposure amount times the manual/charged rate.  <b>NOTE:</b> This field is not applicable for CA as of the first 1995 Normal Anniversary Date.	(N)	77-85	9
20	<b>MANUAL/CHARGED RATE</b> Report the charge per unit of exposure for each classification.  Please contact the DCO for instructions for this field. **WORKERS COMPENSATION STATISTICAL  
REPORTING SPECIFICATIONS (WCSTAT)**

**SECTION 5**

**APPENDIX**

**POLICY TYPE ID CODE DEFINITIONS**

**TYPE OF COVERAGE CODE**

<b>Description</b>	<b>Code</b>	<b>Definition</b>
Standard Workers Compensation Policy	01	Coverage contemplated by the manual/charged rate and classification code to which the exposure amount has been assigned under the provisions of a Workers Compensation and Employers Liability policy.
Alternative Workers Compensation Policy	02	Coverage comparable or similar to State and Federal Workers Compensation coverage and Benefits but written as an alternative to the standard Workers Compensation policy.
Group Policy	03	Refer to the Statistical Plans.
Reserved for Future Use	04	
Large Risk Rating Option (Alternative Retrospective Rating)	05	Standard coverage as described in Code 01, but policy has provisions for a large risk rating option.
Nonstandard Workers Compensation Policy	09	The Standard Workers Compensation policy has been endorsed to either provide additional coverage or to limit the coverage.

**PLAN INDICATOR CODE**

<b>Description</b>	<b>Code</b>	<b>Definition</b>
Voluntary Policy	01	Policy is written voluntarily by the insurer.
Normal Assigned Risk Policy	02	The insured is unable to secure Workers Compensation insurance in the voluntary market, and obtains coverage under a State Workers Compensation Insurance Plan. The plan assigns the policy to a servicing insurer that issues the policy and administers the claims. The policy is reinsured by the member companies under the State Workers Compensation Insurance Plan.
Not Available	03	Used for WCPOLS.
Not Available	04	Used for WCPOLS.
Assigned Risk Policy Voluntary Direct	05	The insured is unable to secure Workers Compensation insurance in the voluntary market, and obtains coverage within a Workers Compensation Assigned Risk Pool. The policy is assigned to and written by an insurer that volunteers and qualifies as a voluntary direct assigned risk insurer. The policy is not reinsured by the pool but the acceptance of the voluntary direct assignments reduces the insurer's pool assessment obligation.
Assigned Risk Policy Mandatory Direct	06	The insured is unable to secure Workers Compensation insurance in the voluntary market and obtains coverage within a Workers Compensation Assigned Risk Pool. The policy is assigned to and written by an insurer that was mandated by the regulator to become a mandatory direct assigned insurer. The policy is not reinsured by the pool but the mandatory direct assignment reduces the insurer's pool assessment obligation.

**POLICY TYPE ID CODE DEFINITIONS**

**NONSTANDARD TYPE CODE**

<b>Description</b>	<b>Code</b>	<b>Definition</b>
Nonstandard does not apply	01	Coverage as described under the standard Workers Compensation and Employers Liability policy without Nonstandard exclusions, endorsements, or exceptions.
Excluding Medical	02	Coverage as described under the standard Workers Compensation and Employers Liability policy, except that the insured pays for all medical and hospital services as required by Workers Compensation law.
Reserved for Future Use	03	
Reserved for Future Use	04	
Excess	05	Coverage as described under the standard Workers Compensation and Employers Liability policy except coverage was endorsed by the Excess Special Endorsement.
Excess Medical	06	Coverage as described under the standard Workers Compensation and Employers Liability policy, except that the insurer provides indemnification for the amount by which medical payments made by the employers as required by Workers Compensation law exceeds a specified per claim or per accident retention.
Reserved for Future Use	07	
State Act Excluding Officers, Partners, Sole Proprietors or Others	08	Coverage under the standard Workers Compensation and Employers Liability policy, except that endorsed by the Sole Proprietors, Partners, Officers, and Others or similar endorsements.
Voluntary Coverage Not Mandatory	09	Coverage under the standard Workers Compensation and Employer's Liability policy except that endorsed by the Voluntary Compensation Endorsement. The Endorsement affords the benefits of a designated compensation law as if the affected employees were subject to that law, even though the law does not require payment of benefits to such employees.
Self-Insured Group	99	Risk is self-insured by participation in a self-insured group.

**DEDUCTIBLE TYPE CODE DEFINITIONS**

**First Position**

<b>Description</b>	<b>Code</b>	<b>Definition</b>
	00	No deductible applies.
Medical Losses only	01	Deductible applies to medical portion of the loss only.
Indemnity Losses only	02	Deductible applies to indemnity portion of the loss only.
Medical & Indemnity Losses	03	Deductible applies proportionately to the medical and indemnity portions of the loss. For example, a loss has indemnity of \$50,000 (2/3 of the loss) and medical of \$25,000 (1/3 of the loss). With a deductible amount of \$10,000, \$6,700 (2/3) would be applied to the indemnity portion and \$3,300 (1/3) would be applied to the medical portion. The loss on the unit would be reported as \$43,300 indemnity and \$21,700 medical in states that require net reporting.
