<b>LINK DATA COMMON TO ALL RECORDS</b>				
1	<b>CARRIER CODE</b> Report the code assigned to the reporting company by NCCI or other DCO.	N	1-5	5
2	<b>POLICY NUMBER IDENTIFIER</b> Report the unique identifier used for identifying the policy.  For Transaction Code 16-Proof of Coverage (POC) Notice/Binder, if a policy number identifier is not available, provide a unique number that can be used to identify this notice. This policy number identifier becomes very important when cancelling this notice and when submitting the policy  Enter only the actual policy number identifier. Do not enter a "binder" or temporary policy number identifier. N/A: CA, DE, MI, NC, NCCI, NJ, NY, PA, WI  Do not report embedded blanks or marks of punctuation.	AN	6-23	18
3	<b>RESERVED FOR FUTURE USE</b>	AN	24-30	7
4	<b>POLICY EFFECTIVE DATE</b> Report the effective date of the policy or POC.  For the second and third year of a three-year variable rate policy, report the effective date of the appropriate annual period being reported.  The second and third year of a three-year variable rate policy must be reported using Transaction Code 04.  Format YYMMDD.	N	31-36	6
5	<b>TRANSACTION ISSUE DATE</b> Report the issue date of the transaction being submitted.  This date is the accounting date on which the data represented by this transaction code was processed by the insurer's policy issuance system.  This date, for a particular transaction, is not necessarily the date of creation of the file. Example: If an insurer processes transactions on a daily basis and saves these daily transactions to a file from which a submission is created once a week, this date would reflect the daily processing date, not the date of the submission creation. Thus, a given file submission may contain transactions with different transaction issue dates.  More than one Transaction Code 06, 08, 10, 14 or 15, or any combination of these transactions with the same Transaction Issue Date for the same policy must not be included on the same submission.  Format YYDDD.	N	37-41	5

Field No.	Field Title/Description	Class	Position	Bytes
6	<b>TRANSACTION CODE</b>	N	42-43	2

Report the code identifying the type of transaction being submitted.

Refer to the Data Reporting Handbook for further instructions.

1	<b>LINK DATA</b> <i>NOT APPLICABLE: DE, MA, MI, MN, NCCI, PA</i>		1-43	43
---	---	--	------	----

Link Data is a collection of data elements that are common to all records in the data specification. These common data elements allow the applicable records to be joined. For presentation purposes only, Link Data is shown as Record Type 0 or 00 and should not be considered a separate record but rather a sub-record within each record.

2	<b>RESERVED FOR FUTURE USE</b>	AN	44-45	2
3	<b>RECORD TYPE CODE</b> <i>NOT APPLICABLE: DE, MA, MI, MN, NCCI, PA</i>	AN	46-47	2

Report "90".

Record Type Code 90 may only be reported using Transaction Code 03. Record Type Code 90 may not be reported on complete policy transactions.

This record type should be used to make changes to policy addresses for fields not included on Record 89. The information on this record will be matched to a policy address based on the Address Type Code, Address - Street, Address - City, Address - State, Address - Zip Code, Name Link Identifier, State Code Link, Exposure Record Link for Location Code.

For each unique policy address, based on Address Type Code, Name Link Identifier, State Code Link, Exposure Record Link for Location Code and Name Link Counter Identifier, only one change set (Address Revision Code A and D) is permitted per Transaction Issue Date for Record 89.
